Systemic Constellation work is a powerful healing modality that allows us to experience deep healing and insight around core issues that have not responded to other forms of healing. In a constellation we step into a living matrix wherein the relationships we've formed with ourselves, our ancestry, our current family and friends, and our future are animated, offering a valuable reflection of our souls and our life choices. During the workshop we will explore some creative applications of systemic constellations along with more traditional forms to maximize your healing experience. You will leave the workshop with valuable self-help tools and ways of applying constellations to benefit your healing process. This potent, multi-faceted work will provide you with a unique opportunity to uncover what truly serves you in your life!
